PROFESSIONAL SUMMARY

Computer Science undergraduate with experience in full-stack web development, AI-powered applications, and modern frontend frameworks. Skilled in React, Next.js, Laravel, and TensorFlow, with a strong interest in scalable web systems and machine learning applications.

EDUCATION

University of Bedfordshire, UK (offered by SLIIT City Uni) | OCT 2022 – OCT 2025

Bachelor of Science with Honours in Computer Science

SKILL SUMMARY

- **Languages:** JavaScript, TypeScript, PHP, Java, Python, C, C++, HTML, CSS
- **Frameworks & Libraries:** React, Next.js, Laravel, Express.js, Tailwind CSS, TensorFlow
- **Databases:** SQL, PostgreSQL, MongoDB, Firebase
- **Tools & Platforms:** Git, VS Code, Figma, Node.js, Android Studio
- **Other:** RESTful APIs, UI/UX Design, MVC Architecture, Agile, JWT Authentication, Vercel Deployment
- **Soft Skills:** Communication, Problem Solving, Teamwork, Adaptability, Time Management, Leadership

WORK EXPERIENCE

Software Engineer (Remote) | 2xDev, California | NOV 2025 – PRESENT

- Built a scalable Next.js travel management app with improved performance and responsive design.
- Developed and enhanced frontend and backend features, improving user experience, usability, and engagement.
- Optimized application performance using code splitting and efficient rendering.
- Worked in an agile team, delivering iterative updates that improved feature stability and sped up release cycles.
- Improved application efficiency and scalability, enabling smoother interactions and better maintainability.

Junior Full Stack Developer (Contract) | Mazz Digital LLC, UAE | JUN 2025– NOV 2025

- Improved e-commerce application performance and responsiveness, enhancing overall user experience
- Developed and maintained scalable full-stack features using React and Laravel for multiple client platforms
- Built and optimized RESTful APIs to support smooth order processing and real-time data flow
- Collaborated with cross-functional teams to deliver client requirements, improving delivery efficiency and project turnaround time
- Contributed to system stability and performance improvements, reducing downtime and enhancing platform reliability

Frontend Developer Intern | Amerck Inc, Colombo | SEP 2024 – APR 2025

- Developed responsive and reusable UI components using React for scalable web applications
- Enhanced user experience by improving UI design consistency, usability, and overall performance
- Collaborated closely with backend developers and cross-functional teams to ensure seamless API integration
- Maintained strong team communication to understand and deliver client requirements effectively
- Contributed to iterative improvements based on client feedback, ensuring higher client satisfaction and usability

PROJECTS

AI-Based Waterfall Detection System (Sri Lanka) | React, Node.js, Express, MongoDB, Python (TensorFlow) | [GitHub Repository](#)

- Developed an AI-powered web application to detect and classify waterfalls using image recognition.
- Integrated a trained TensorFlow model with FastAPI backend, achieving **high prediction accuracy (up to ~90% after training and tuning)**.
- Reduced prediction latency **through backend optimization and efficient API integration**.
- Built a full-stack system using React and Node.js/Express, improving overall system usability and user experience.

Travel Booking System | Next.js, React, TypeScript, Supabase, Tailwind CSS | [GitHub Repository](#)

- Developed a full-stack travel booking platform for browsing and booking travel experiences and activities.
- Built a responsive and modern UI using Tailwind CSS, improving user experience and navigation efficiency.
- Implemented secure authentication and real-time data handling using Supabase backend services.
- Designed dynamic search, filtering, and booking workflows to enhance user discovery and conversion rates.
- Structured scalable frontend architecture using Next.js and TypeScript for better performance and maintainability.

E-commerce Handling System | React, Laravel, Inertia.js, Tailwind CSS, MySQL | [GitHub Repository](#)

- Developed a full-stack e-commerce management system to handle product listings, orders, and customer data.
- Built dynamic and responsive UI using React and Tailwind CSS, improving user experience and usability.
- Implemented seamless frontend-backend integration using Inertia.js, reducing page reloads and improving performance.
- Designed and optimized database structure using MySQL for efficient data handling and scalability.
- Enhanced system performance and workflow efficiency, reducing manual processes and improving response time.

Vehicle Auction System | HTML, CSS, JavaScript, SQL

- Designed and developed a dynamic auction platform for vehicle listings and bidding.
- Structured and managed a relational database for efficient data handling.
- Implemented core auction functionalities, including bidding and item management.

Grocery Shop Mobile Application | Java, Firebase (Android Studio)

- Built an Android application for grocery ordering and inventory management with real-time database integration using Firebase. Enabled seamless product browsing, ordering, and updates in real time

AWARDS & ACHIEVEMENTS

2nd Place – Project Poster Presentation, 4th Annual Research Conference of SLIIT City Uni 2025

- Recognized for an AI-based waterfall detection system, highlighting innovation in applying machine learning for tourism and environmental exploration
